GREAT BRITAIN'S

Washington, Oct. 3.—Great Britain's embargo on the export of all supplies to the northern European neutral countries, just announced, was declared after every phase of its possible effect was gone over in conferences between American and allied statemen

supplies to Germany. American offi-clals and some of the allies hereto-fore have hesitated as just how far to go in demanding cessation of trade between the neutrals and Germany. At one time it appeared they would ask no more than that neither goods nor materials supplanted by allied commodities be sold to Germany by the neutrals.

The new policy can be accomplished through rigid embargoes applied by all the allies. The neutrals cannot exist without British and American supplies, and within the next two or three months all of them are expected to declare flat embargoes or the to declare flat embargoes on the ex-port of their commodities to all coun-tries. This will hit England as well as Germany, but the British, who can draw on the United States, are in a position to do without neutral goods, while Germany, cut off from the rest of the world, cannot exist, officials here say, if neutral shipments cease.

To those familiar with the military an deconomic situation in Germany, the new policy indicates that the allied governments have come to the con-clusion that by making every use of economic weapons the war will be ended much more quickly than by mill-tary supremacy alone.
